

JOHN BENEDICT SANTOS

FULL-STACK DEVELOPER / SOFTWARE DEVELOPER

zbenedictjhon88@gmail.com | (+63) 9755092185 | Nueva Ecija, Philippines | <https://santosbuilds.dev>

PROFESSIONAL SUMMARY

Highly skilled Full-stack developer with 7+ years of experience in building scalable web applications using PHP, React, Express, TypeScript and RESTful APIs. Proficient in developing robust front-end and back-end systems. Seeking to contribute expertise in full-stack development to a dynamic team.

TECHNICAL SKILLS

Frontend: React, Vite, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, React Native Expo, Flutter (Dart)

Backend: PHP, Python, Django, Node.js, Express, RESTful API design & development, API integration, Authentication & Authorization (JWT, session-based), Stripe Payment Integration

Databases: MySQL, Firebase, PostgreSQL, Sequelize ORM

Tools and DevOps: Git, Bitbucket, GitHub, Docker, Vercel, Putty, Ngrok, Ollama (Local LLM deployment & integration)

Concepts: Full-stack development, CRUD operations, Client-server architecture, Database design & normalization, Debugging & troubleshooting, Agile/Scrum

WORK EXPERIENCE

Full-Stack Developer

Tranzend Solutions and Trading Corp. | August 2018 - Present

- Collaborated with project managers and developers to define specifications, establish timelines, and deliver high-quality projects within strict deadlines.
- Kept updated with web development trends and technologies.
- Developed full-stack solutions using HTML, CSS, JavaScript, and frameworks such as CodeIgniter 3, Yii 1.1, and React.js.
- Performed troubleshooting on production issues, carried out system maintenance, and implemented enhancements.
- Designed and maintained databases.

FREELANCE PROJECTS

Freelance Full-Stack Developer - LocalFit Media | October 2025 - Present

- Integrated AI features into the application, implementing webhook-based workflows and automating processes using scheduled cron jobs.
- Developed and maintained RESTful APIs using Node.js and Express, and implemented Firebase for real-time data synchronization and user authentication.
- Integrated Stripe payment processing for handling transactions within the application.
- Deployed applications on Vercel and configured custom domains via Hostinger, while collaborating in daily team updates to deliver continuous improvements and maintain system reliability.

E-Commerce Platform - Supremacy International | 2026

- Built a frontend e-commerce application from design to full code implementation.
- Implemented REST API integration to fetch and manage data from the backend.
- Refactored the existing backend, converting it into a RESTful API architecture.

AI-PAMS (AI-Powered Project Allocation Management System) | 2025

- Contributed to deployment using Vercel and Ngrok.
- Integrated AI features to enhance project allocation automation.
- Improved system efficiency by streamlining API responses and data processing.

ICT Infrastructure and Permit Application | 2024

- Designed and developed an online platform for building permit applications.
- Built using Yii 1.1, Bootstrap, and MySQL.

Apartment Management System | 2024

- Developed a web system for browsing and managing apartment listings.
- Implemented search and filtering features using JavaScript and MySQL.

PERSONAL PROJECTS

AuraWash - Laundry SaaS Platform (Solo Developer) | January 2026 - Present

- Independently developed a subscription-based multi-tenant SaaS platform for laundry businesses, enabling branch management, order tracking, and sales monitoring across multiple locations.
- Designed and built full-stack architecture using React.js, Node.js (Express), Tailwind CSS, and MySQL, including RESTful APIs, authentication, and real-time data processing.
- Implemented core business systems such as subscription management, credit-based usage model, role-based access control (admin, staff, driver), and analytics dashboards.
- Deployed and maintained production environment using Vercel and Hostinger, including custom domain configuration, hosting setup, and CI/CD deployment workflow.
- Built and launched the system end-to-end from development to production.

Kwenta - Personal Finance Tracker (Solo Developer)

- Developed and deployed a subscription-based personal finance web application with configurable plan tiers using React, Node.js, and Supabase (PostgreSQL).
- Built core finance features including expense/income tracking, budget planning, savings goals, debt tracking, and investment monitoring.
- Implemented recurring transactions, bill reminders, and detailed financial reports and analytics.
- Integrated an AI-powered chatbot to assist users with financial queries and insights.
- Added theme customization for personalized user experience; deployed and maintained the application in production.
- Built a companion mobile application using Flutter with offline-first functionality and automatic data synchronization once internet connectivity is restored.

EDUCATION

Bachelor of Science in Information Technology

Nueva Ecija University of Science and Technology | 2018

Computer System Servicing NC II

TESDA | 2017

CERTIFICATES

- Imagine Camp 2017 - Microsoft Computer Society (2017)
- Central Luzon Youth Congress on Information Technology (2017) - Topic: Android Mobile Apps Development, Network Security, Adobe Experience Design, Arduino Microcontroller
